

THIXO+

Microcement thickener

DESCRIPTION

THIXO+ is a very fine powder that improves the application properties of microcement. It stabilizes the mixture, thickens the microcement, suspends and stabilizes pigments, and prevents clumping. It does not alter other parameters of the microcement.

PRODUCT PROPERTIES

- Improves consistency
- Stabilizes pigments
- Prevents clumping

HOW TO USE

Add 0.5–2% **THIXO+** to the microcement mass (e.g., 5–20 g per 1 kg of microcement). Mix thoroughly until a homogeneous mass is obtained. The product is insoluble and forms a suspension. There are no restrictions on the maximum dosage – trial tests are recommended..

TECHNICAL DATA

- Composition: Amorphous synthetic silica (CAS: 7631-86-9 / 112945-52-5), purity: min. 99%.
- Shelf life: 12 months. Store in a dry place in a tightly closed container.

PACKAGING

The product is supplied in 50 g packaging.

CLEANING OF TOOLS

Clean equipment and tools immediately after use with water.

SAFETY

- **Notes:** Light, dusty powder – use in a well-ventilated area.
- Avoid inhaling dust.
- Wear protective clothing and a dust mask.
- Protect eyes and respiratory system. Product for professional use.
